DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claims 1-6 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited. Also, it is not clear what parts of the invention are the improvements.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3724

5. As best understood, claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Lambert et al. (4,507,998).

Lambert et al. discloses (Fig. 1-7) the invention including a conveyor fixing system 200, circular saws 302, chains 212 and teeth 214. The device of Lambert et al. is capable of being use for cutting coconut.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kistner et al., Reuter et al., Müller et al., Hitz and Arasmith are cited to show a related device.
